SUMMARY

Detail-oriented final-year undergraduate, currently building knowledge in data engineering, DevOps and AI/ML through coursework and hands-on projects. Gaining practical experience by applying these skills in academic work and small-scale implementations. Eager to bring a strong work ethic and willingness to learn, focusing on delivering reliable, well-organized work to the team.

EDUCATION

Bachelor of Science Honours in Cloud Computing

Mar 2023 – Mar 2027

Sri Lanka Technology Campus

- Big Data | Data Warehousing | Cloud Infrastructure Design | Artificial Intelligence | Machine Learning | Linear Algebra
- CGPA: 3.40

G.C.E.(A/L) Examination – Physical Science (English Medium)

Oct 2020

Wayamba Royal College, Kurunegala

- Combined Mathematics | Physics | Chemistry

PROJECTS & SKILLS

CogniGuide (Capstone Research Project) – In Progress

- Ongoing research project focused on studying how Generative AI use affects teenagers' critical thinking, metacognitive awareness and independent problem-solving. Contributing to dataset collection and preparing the development of an adaptive, scaffolding-based AI agent using Flutter, Flask and Supabase.

Local AI Email Agent

- Built a fully local AI agent that reads unread emails via IMAP, analyzes them with a local LLM (Ollama + PydanticAI), then drafts and sends replies via SMTP only after explicit human approval. Implemented the end-to-end Python pipeline (fetch, analyze, review, send) and planned to compare against a no-code n8n workflow.

Automated Daily Crypto Price Ingestion (Batch ETL)

- Built a Python-based batch ETL pipeline that fetches daily cryptocurrency prices from CoinGeko API, cleans them with pandas and stores csv outputs in AWS S3 via boto3, automated on a schedule using GitHub Actions and IAM least-privilege credentials.

EXTRACURRICULAR & LEADERSHIP

IEEE Computer Society Student Branch Chapter – SLTC

Aug 2025 – Present

- Assistant Secretary
